## ISOBAG – CRYOMED pouches

ADP Conseil has developed a system of protection of thermosensitives products for the transport from the point of sale to the place of residence of the customer.

### General informations:

This insulated pouch allows to protect thermosensitives products during their transport between the place of sale and the customer's home

### DETAILED INFORMATIONS:

- External in metalized polyester under vacuum
- Central core in closed cells polyethylen foam
- Inner lining in white polyethylen food grade

### ISOBAG pouches: Protection from 30 minutes to 2 hours (According to the load produces)

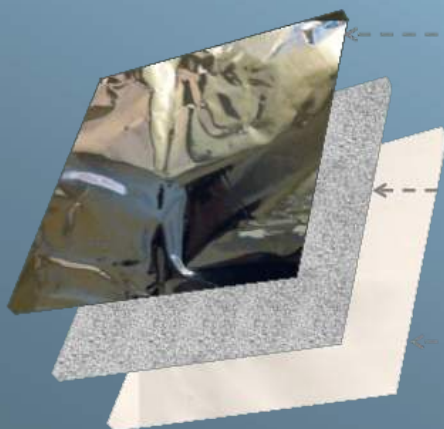

This cold pouch permits to avoid thermal shocks and clipping the temperature rise of the thermosensitives products...

These packagings are available with closures zip with or without cut handle or zip on cursor.

Possibility of printing up to 8 colors first side / reverse in high-definition flexography.

#### **Sizes :**

- Standard Size: 20 x 25 cm, neutral, available on stock
- Format mini : 11x16 cm      Format maxi : 62x62 cm
- Personnalization from 25 000 pieces

External side in metalized polyester under vacuum 12 micro, complexed on 50 micron
